2026-01-10 11:27:21

On the occasions I am called in to the surgery I receive efficient, and competent attention. Making an appointment to see a doctor is very difficult and more significantly there is no continuity of GP service, so as I see it, the doctors never get to know their patients. Maybe this is inevitable now with the pressures within the service. And I have nothing to compare other than the surgery in Hagley > 15 years ago.

2026-01-10 12:55:44

Every one of my visits to see Tracey are wonderful. She makes a triggering experience actually one to look forward to! She remembers who I am each time, she's kind, relatable and she also remembers what we've talked about previously. She's wonderful.

It was good to actually be seen by Dr Zamir as I haven't been able have an appointment with her for years. She listens and understands.

2026-01-15 16:03:33

Just like to comment that despite my excellent experience I had more blood tests than what was agreed with the practice . I advised the nurse that some tests were postponed by the surgery doctor but somehow they were not

eliminated from the paperwork received by the nurse. And the nurse said she had to do all the tests on her paperwork. This was fine for me but wanted to raise this in my feedback.

Seen early. Treated with kindness and dignity.

2026-01-17 12:16:13 Satisfactory
treatment.

2026-01-17 14:51:47

I had agreed to an appointment with a trainee GP as at my previous practice they were accompanied by a GP. This was not the case. The doctor did not know what ICSI was. I had my ongoing pain and concerns dismissed as stress caused by moving home. No advice or solution was offered. I had attended the appointment to ask for a CA125 blood test as advised by my doctor daughter, due to my ongoing symptoms. This was arranged although I would not have left the surgery without this outcome. I was contacted by the doctor that afternoon asking me to take a FIT test. This was not mentioned as a possibility during the consultation. I did not feel my concerns had been taken seriously or addressed in any way. I would not have confidence in seeing this doctor unless they were accompanied by a more senior colleague. I do not like to leave negative feedback but I have been assured by my daughter that it is both useful and necessary under the circumstances

Corinne Beirne is one of the surgerys prime assets. She always goes over and above for her patients, which is much appreciated.

The nurse was very friendly and the blood test was swift and painless. It was also lovely to be able to get some books in the waiting area.
